Flags:

Control Flags (how instructions are carried out):

- D: Direction 1 = string op's process down from high to low address
- I: Interrupt whether interrupts can occur. 1 = enabled
- T: Trap single step for debugging

Status Flags (result of operations):

- C: Carry result of unsigned op. is too large or below zero. 1 = carry/borrow
- O: Overflow result of signed op. is too large or small. 1 = overflow/underflow
- S: Sign sign of result. Reasonable for Integer only. 1 = neg. / 0 = pos.
- Z: Zero result of operation is zero. 1 = zero
- A: Aux. carry similar to Carry but restricted to the low nibble only
- P: Parity 1 = result has even number of set bits
